To Whom It May Concern:

Adagio Health is committed to "Live Well" and help make Allegheny County the healthiest county in the nation.

Our intent is to work with the Allegheny County to become a Live Well Workplace.

We are committed to providing healthy food options during company meetings and functions. Options will include, but will not be limited to: fruits, vegetables and gluten-free options. We are also committed to having vending machines that offer healthy snack options.

We have access to water coolers on each floor. We are a tobacco, smoke-free work environment and offer free smoking cessation through our benefit plan.

Adagio Health is a proponent of breast feeding and we allow our employees to pump at work in designated, private areas.

Our employees are offered comprehensive and affordable health insurance, which includes free dental and eye coverage. All preventive co-pays are free.

We also encourage our employees to use the well lit stairwells instead of elevators.

For these reasons, among others, we are committed to being a Live Well workplace.

Please contact our Human Resources Manager, Marsha Turner, x 123 or me at 412-288-2130, x 163.

Thank you in advance for your consideration.

Sincerely,

Kathy Risko

Chief of External Affairs
